PASSION 4 ACTION

The all new 150 acres RSL Shuttlecock Feather Processing Plant (about 56 football fields) is the biggest in the world. This is the newest addition to RSL factories and it deals only with feather processing. It is currently processing over 2.7 tons of raw feather per day and close to 80 tons per month which amounts to 70 million pieces of feather. RSL sees feather as the most important part of a shuttlecock as it determines the shuttles' durability, flight and speed, which is why we want to control the quality at its source in raw feather form. This means we always have an abundant supply of consistently top quality feather all year round.

In line with making satisfactory progress in business, RSL also helps to promote badminton as a sport by sponsoring international tournaments and players particularly by way of special assistance to help those countries which are still in the course of development programmes. All these efforts are made with a view in promoting badminton as a sport. It is believed that the professionalism of our equipment and exposure of our products will enable more badminton supporter to gain access to these benefits.

THE BIGGEST RSL FACTORY EVER !!

Tourney No.1

- Specially selected finest A grade feathers
- Excellent durability, flight with accurate speed
- Good appearance

Speeds Available:

International : 73-81
Japan : 1-5

Silver Feather

- Specially selected finest B grade feathers
- Good durability, flight with accurate speed
- Good appearance

Speeds Available:

International : 73-81
Japan : 1-5

Power

- Specially selected finest high quality feathers
- Good durability, flight with accurate speed
- Good appearance

Speeds Available:

Japan : 1-5
(Exclusive for Japan)

Ace

- Specially selected finest high quality feathers
- Good durability, flight with accurate speed
- Good appearance

Speeds Available:

International : 73-81

Standard

- Specially selected finest high quality feathers
- Good durability, flight with accurate speed
- Good quality, shuttles at an affordable price

Speeds Available:

International : 73-81

Official

- Tested for durability flight and speed
- Good durability, shuttles at an affordable price

Speeds Available:

International : 73-81

First Step

- Tested for durability flight and speed
- Good durability, shuttles at an affordable price

Speeds Available:

Japan : 1-5
(Exclusive for Japan)

Practice

- Tested for durability flight and speed
- Good durability, shuttles at an affordable price

Speeds Available:

International : 73-81

PERFORMANCE SERIES

PASSION 4 NOISSAP

Classic Tourney

- Specially selected Top Premium Feathers
- Used in Major tournaments and world events
- Maximum Durability and Flight with precision in speed
- Gives a perfect feel

Speeds Available:

73-81 and High Altitude
Japan 1-5

PASSION 4 ACTION

Classic Tourney

- Specially selected Top Premium Feathers
- Used in Major tournaments and world events
- Maximum Durability and Flight with precision in speed
- Gives a perfect feel

Speeds Available:

73-81 and High Altitude
Japan 1-5

No.1 Tourney

Match Play feather shuttlecock, chosen almost every major event played throughout the world.

Speeds Available:

73-81 and High Altitude

No 2 Tourney

Quality feather shuttle for country and top club standard, Flight and speed are as consistent as a Tourney shuttle.

Speeds Available:

73-81 and High Altitude

No.3 Tourney

A good quality feathered shuttle. Ideal for club play.

Speeds Available:

73-81 and High Altitude

No.4 Tourney

Economic shuttles ideal for school team practice.

Speeds Available:

73-81 and High Altitude

No.5 Tourney

This shuttle is economically priced. Ideal for 'club practice'

Speeds Available:

73-81 and High Altitude

No.6 Tourney

This shuttle is economically priced. Ideal for school team practice

Speeds Available:

73-81 and High Altitude

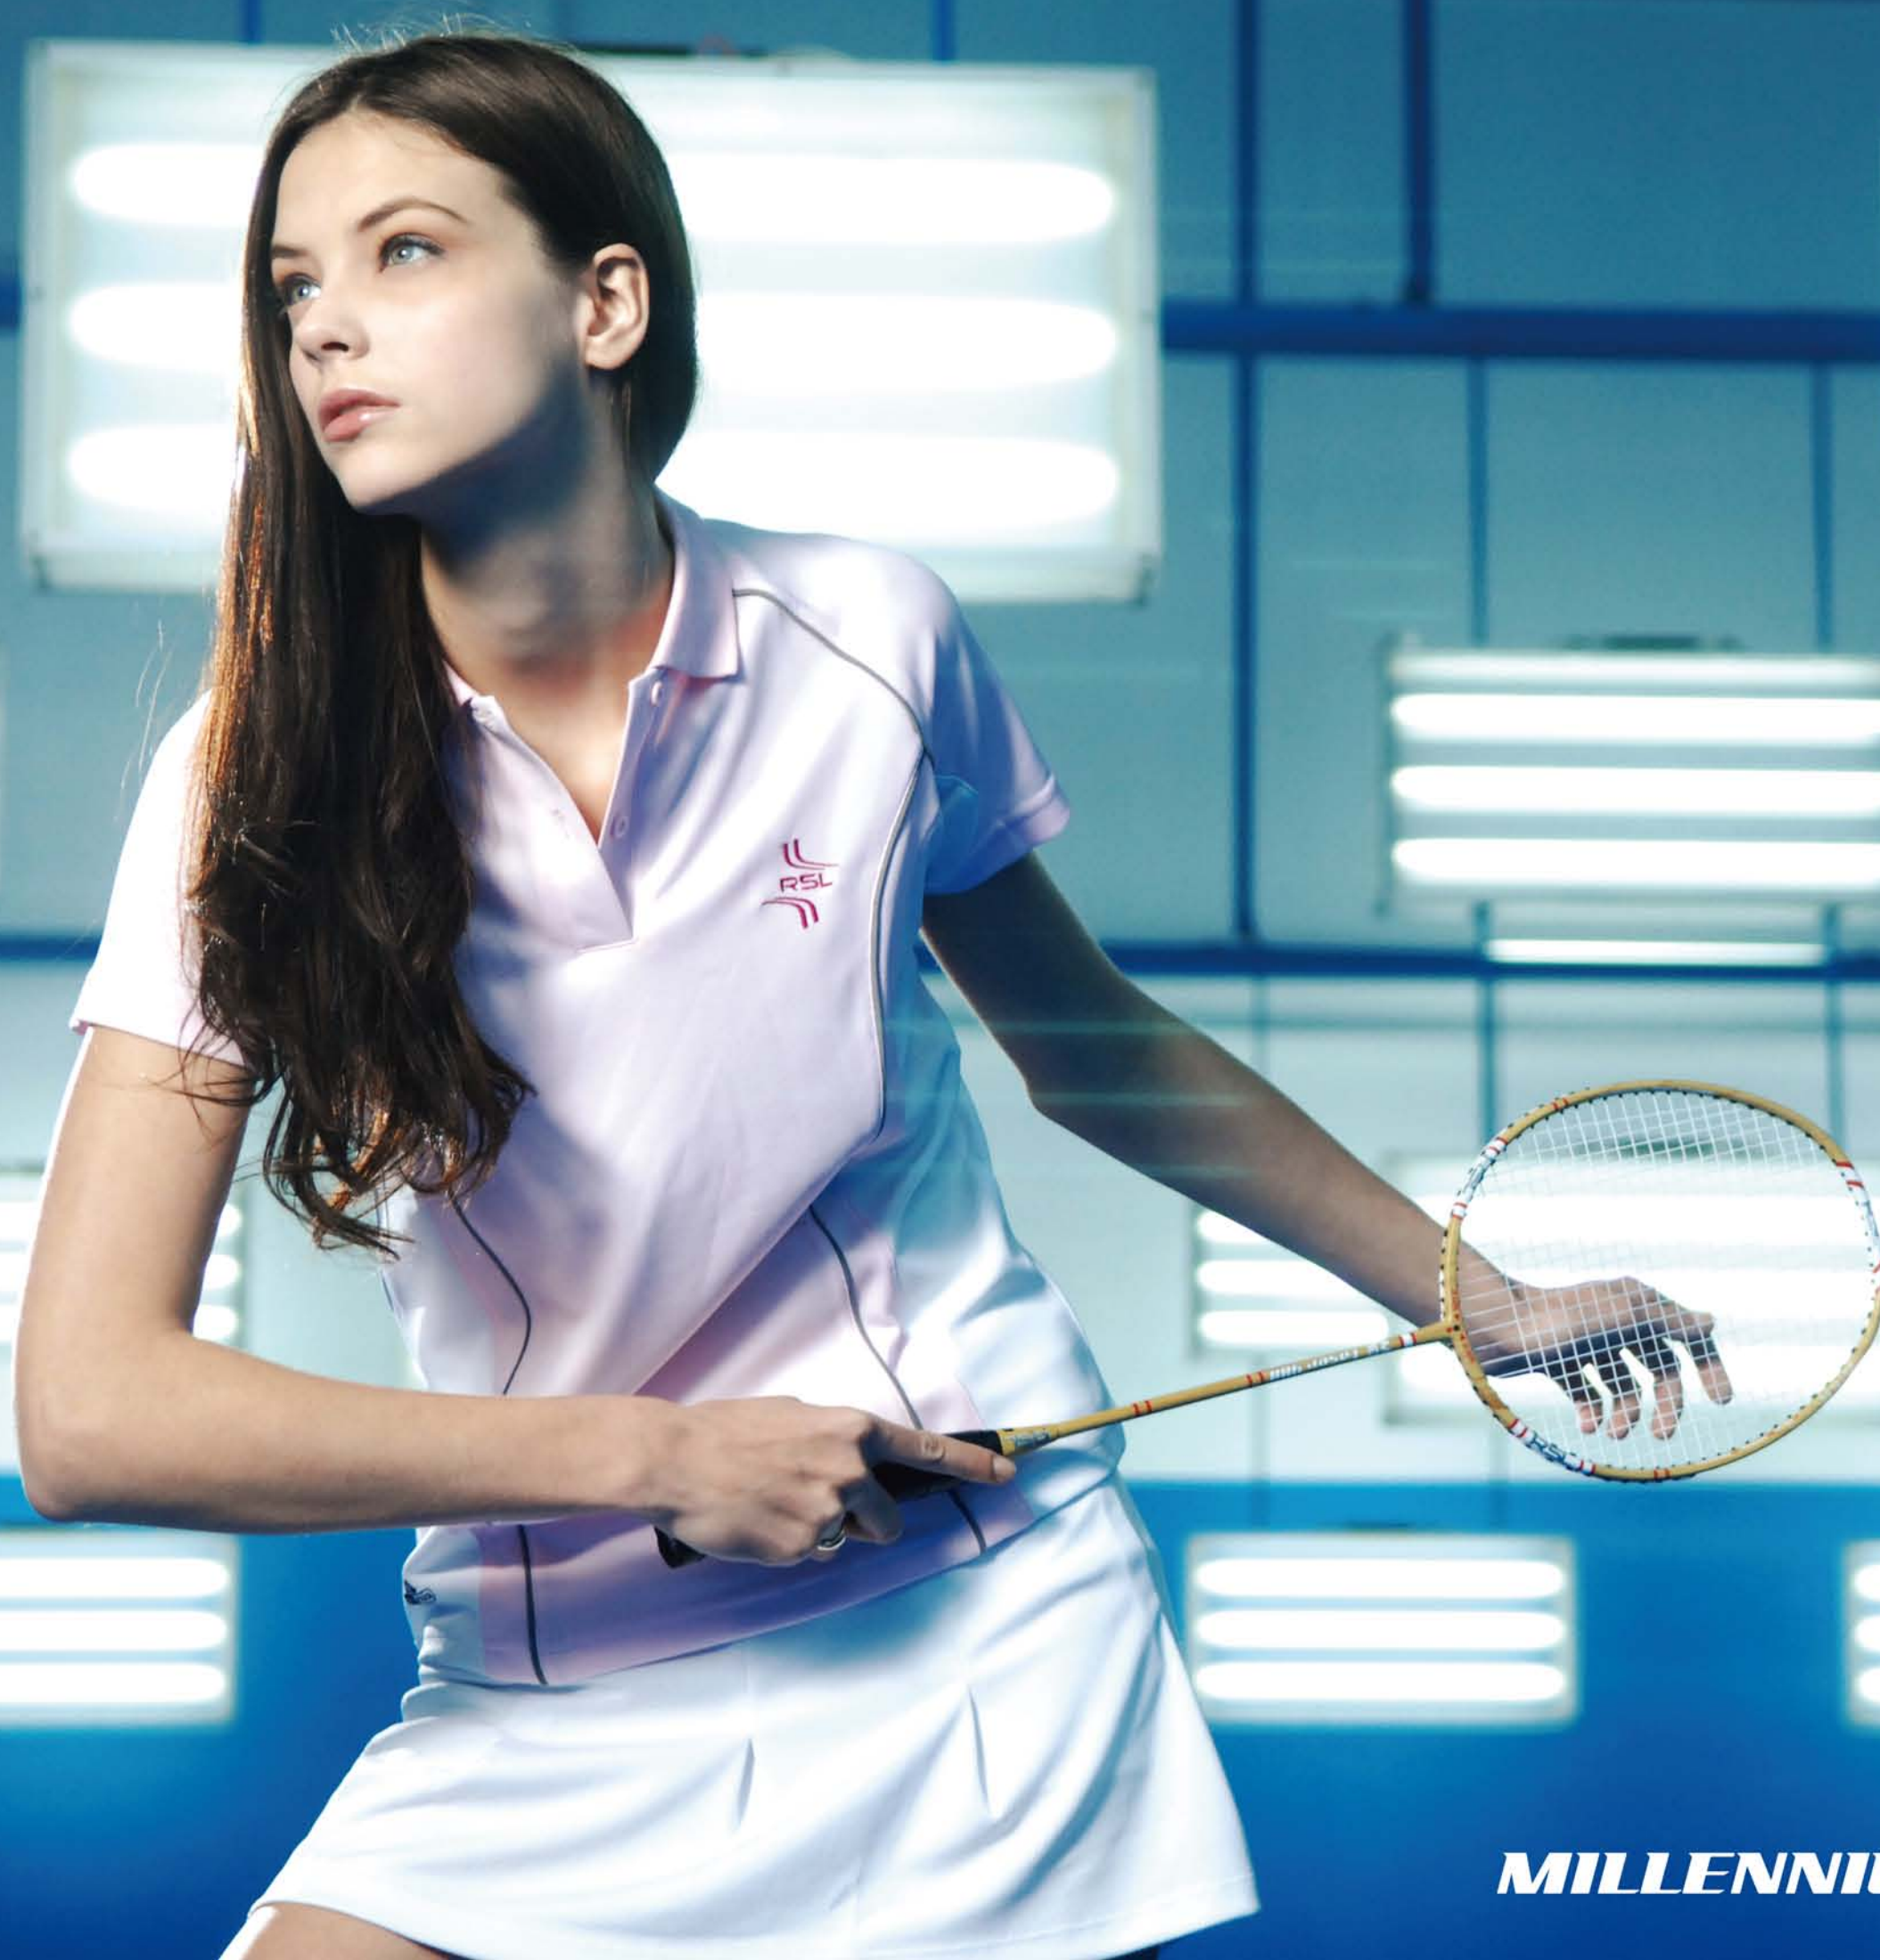

No.7 Tourney

This shuttle is economically priced. Ideal for beginner level.

Speeds Available:

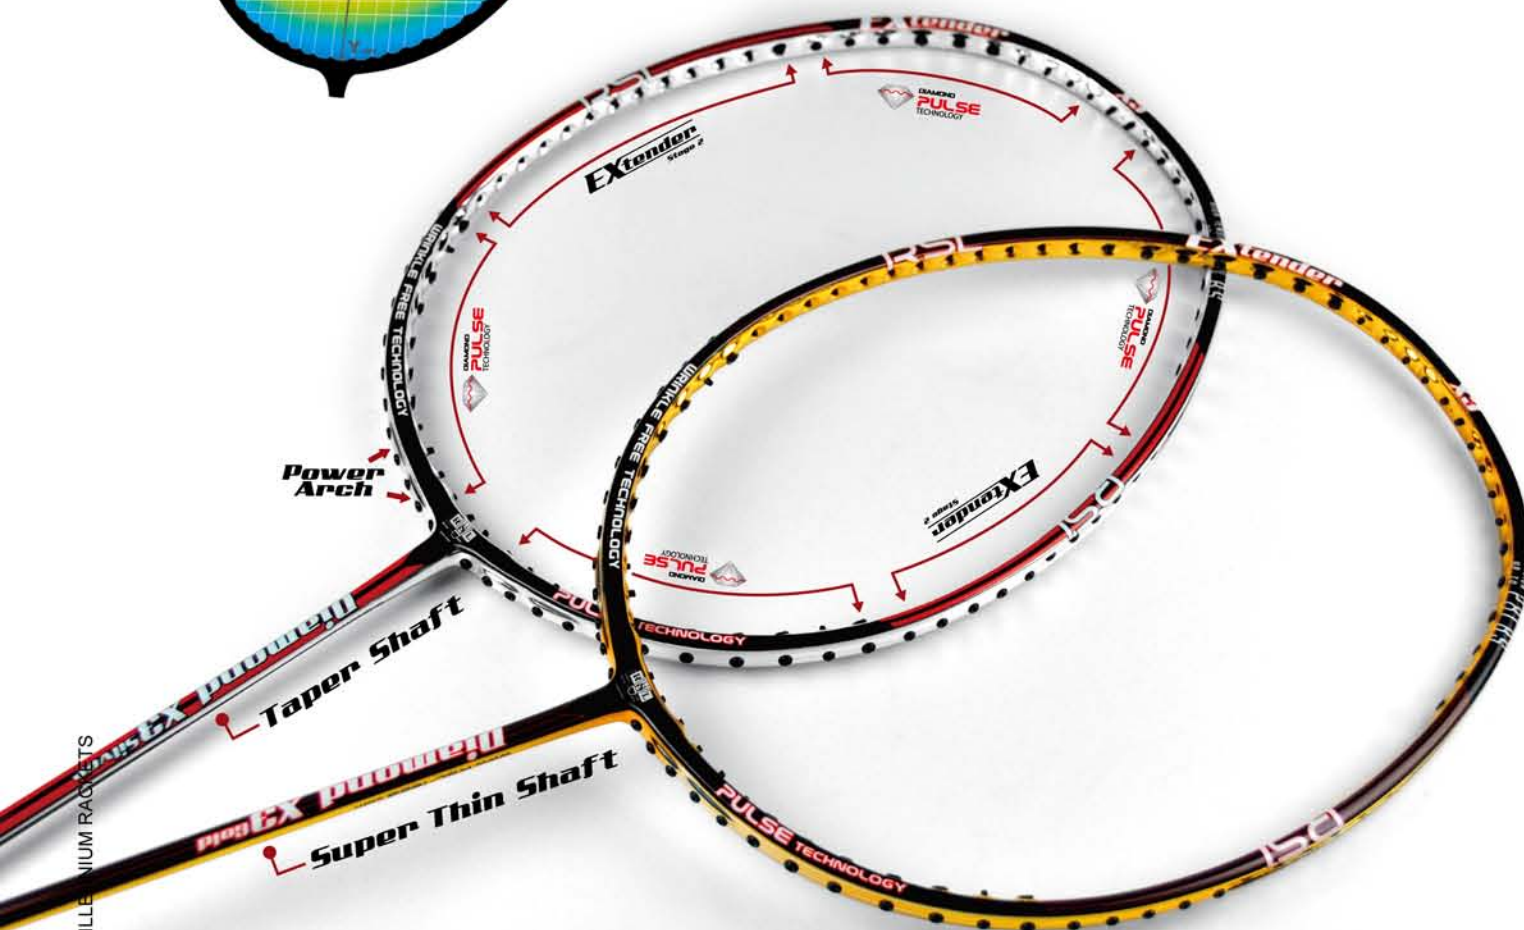

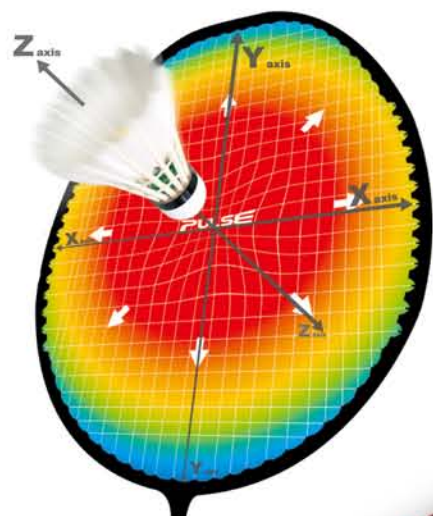

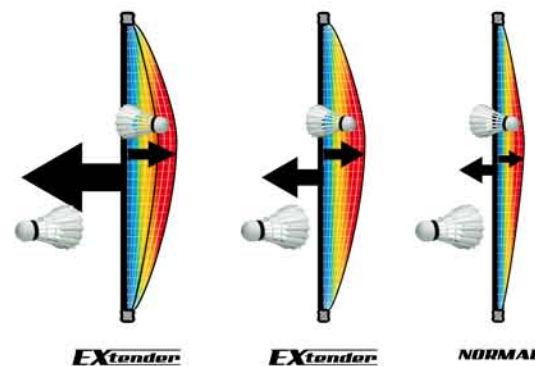

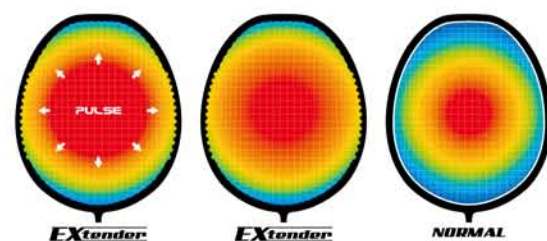

73-81 and High Altitude

Diamond X3

Extender Stage 2

The Extender Stage 2 was reengineered from Stage 1 especially for Diamond X3 to work at its best with the Pulse Technology. The Pulse technology gives X2 one of the strongest head frame in the market, and with the new Extender Stage 2 design we manage to keep the strength of the frame but injecting much more power into what is already an incredible racket.

Diamond X3 Gold

Shaft 7 mm
Weight 86 - 88 g
Length 675 mm
Max. String Tension
High Tension Up to 28 lbs

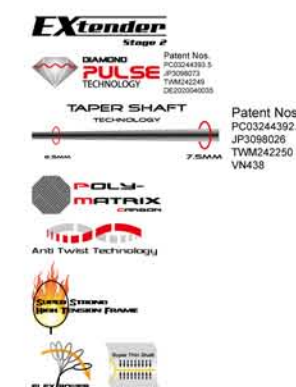

Stiff - Flex
S F
Power - Control
P C

Diamond X3 Silver

Shaft 6.5 - 7.5 mm Taper Shaft
Weight 86 - 88 g
Length 675 mm
Max. String Tension
High Tension Up to 28 lbs

Stiff - Flex
S F
Power - Control
P C

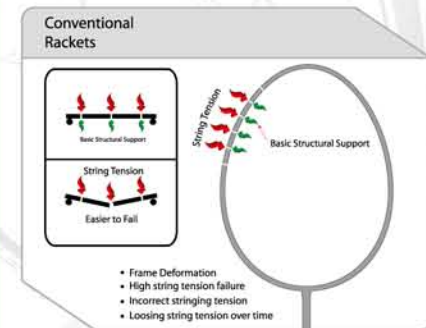

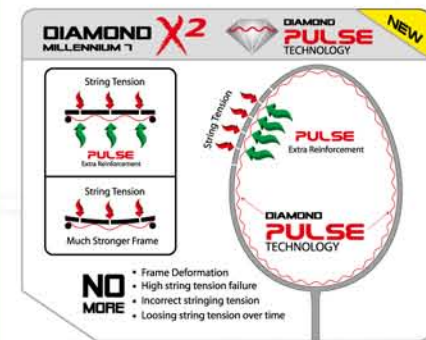

DIAMOND X2

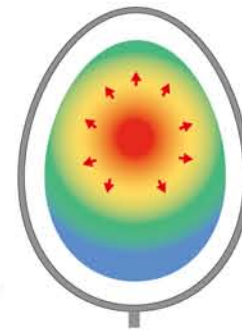

20% STRONGER FRAME THANKS TO PULSE TECHNOLOGY
MORE POWERFUL SWEET SPOT
BIGGER SWEET SPOT
MORE FEEL UPON IMPACT
RETAIN INITIAL TENSION LONGER
MORE ACCURATE TENSION DURING STRINGING

Now with X-stiff

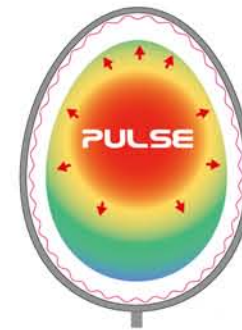

X2 racket has been such a huge success in changing the definition of Power and Accuracy, we have made 2 special edition X2 rackets to celebrate our 80th anniversary that is Extra Stiff for top players like you!

Conventional Rackets

DIAMOND X2

- More Power Sweet Spot
- Bigger Sweet Spot

DIAMOND X2 GOLD

Flex X - Stiff
Shaft 7 mm
Weight 91 - 93 g
Length 675 mm
Max. String Tension
High Tension Up to 28 lbs

DIAMOND X2 BLUE

Flex Tapered X - Stiff
Shaft 6.5 - 7.5 mm Taper Shaft
Weight 83 - 85 g
Length 675 mm
Max. String Tension
High Tension Up to 28 lbs

Super Thin Shaft

Taper Shaft

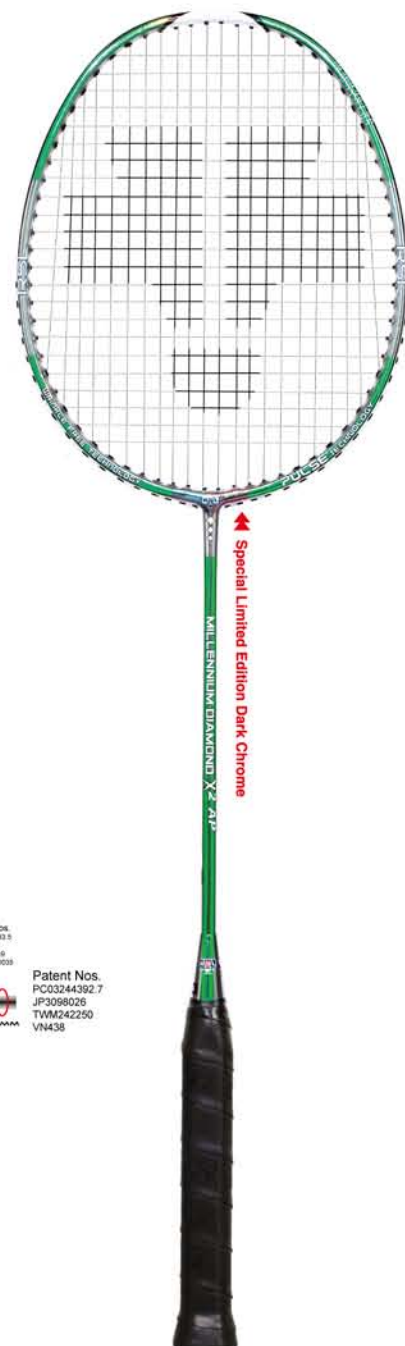

DIAMOND X2 Pro

Flex Extra Stiff
Shaft 7 mm
Weight 89 - 91 g
Length 675 mm
Max. String Tension
High Tension Up to 28 lbs

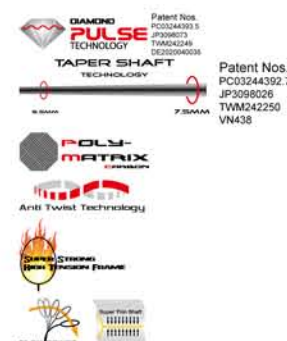

DIAMOND X2 AP

Flex Progressive Medium Stiff
Shaft 6.5 - 7.5 mm Taper Shaft
Weight 84 - 86 g
Length 675 mm
Max. String Tension
High Tension Up to 28 lbs

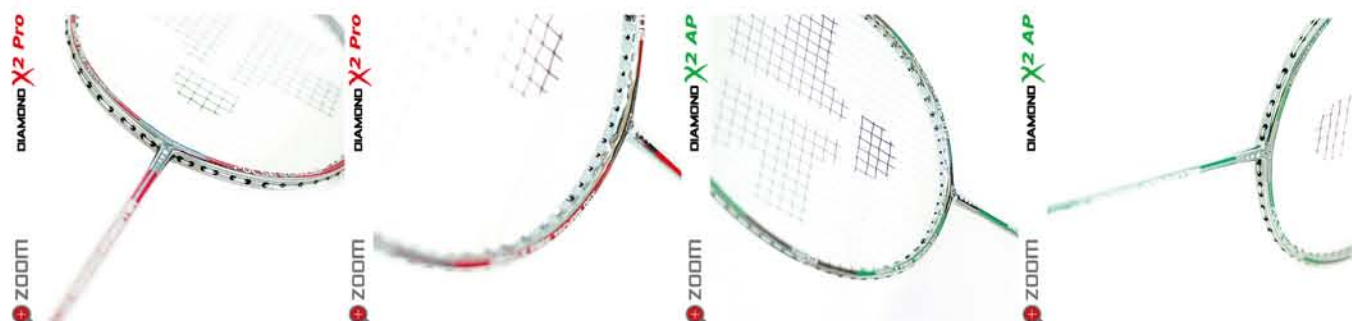

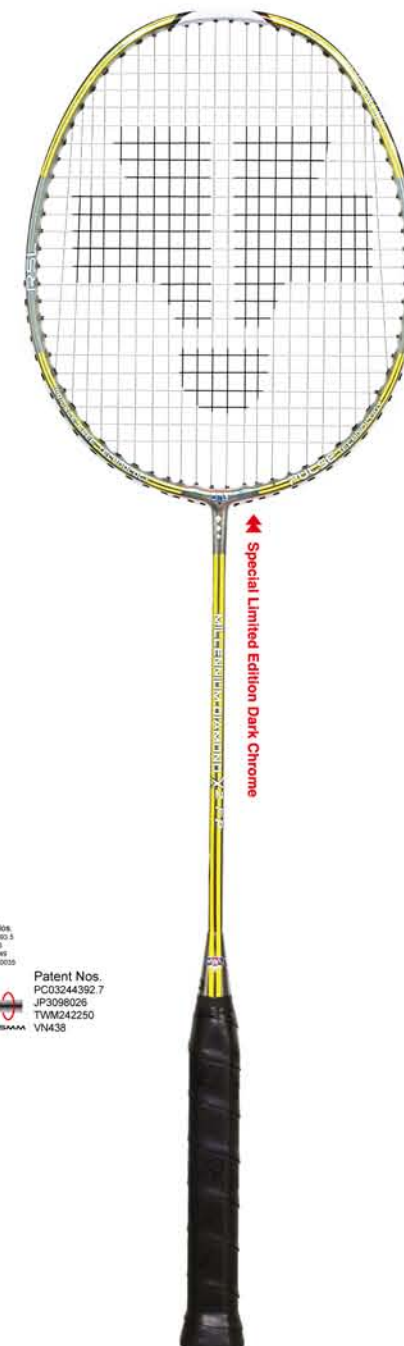

DIAMOND X2 SP

Flex Progressive Medium Flex
Shaft 6.5 - 7.5 mm Taper Shaft
Weight 82 - 84 g
Length 675 mm
Max. String Tension
High Tension Up to 28 lbs

DIAMOND X2 FP

Flex Progressive Medium
Shaft 6.5 - 7.5 mm Taper Shaft
Weight 79 - 80 g
Length 675 mm
Max. String Tension
High Tension Up to 28 lbs

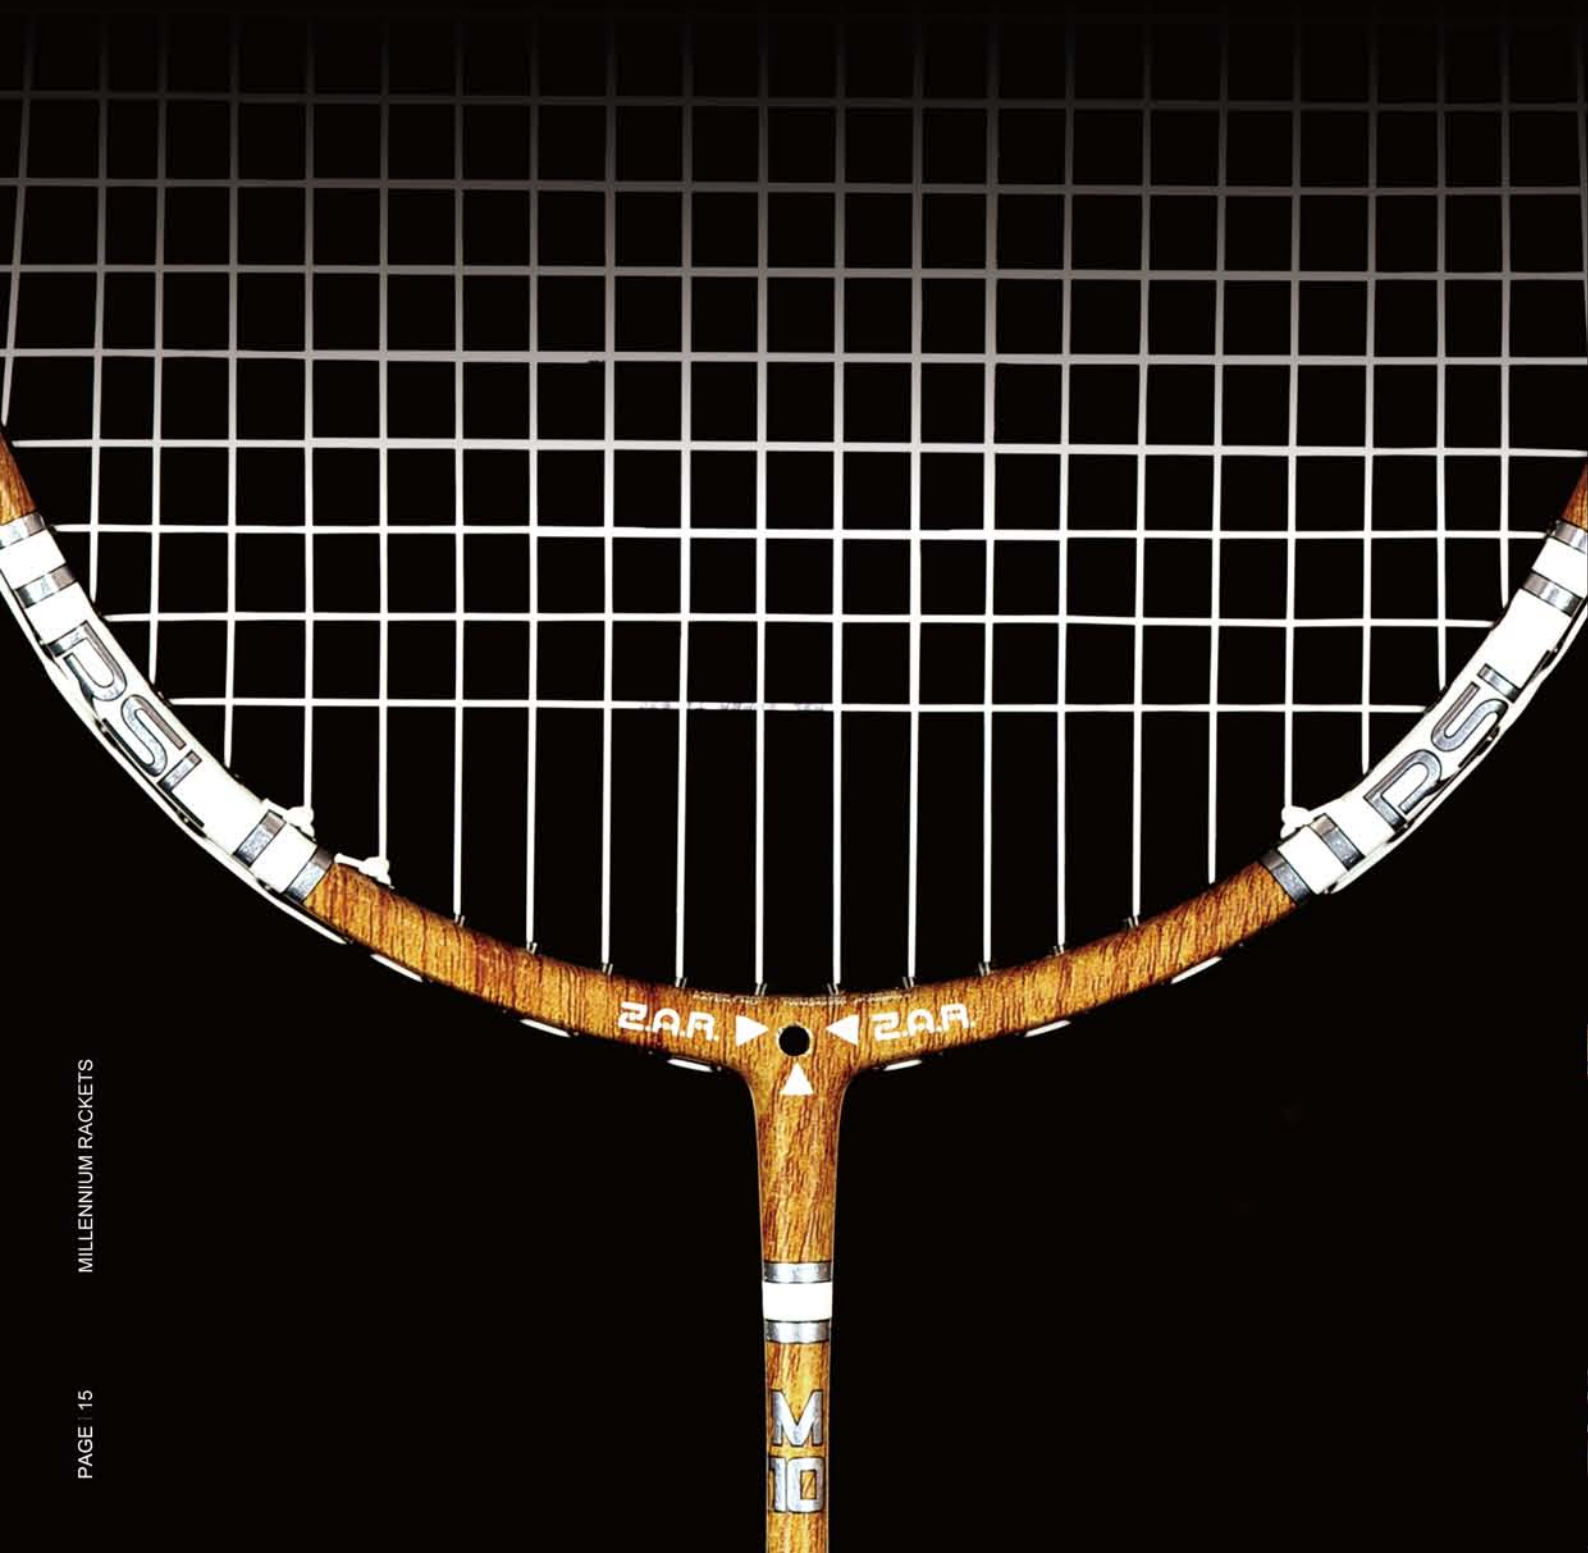

Z.A.R.

Technology

Zeero Air Resistant technology

ZAR Technology:

Zeero Air Resistant technology (ZAR) is a simple but ingenious way of reducing racket air resistance. The T-joint has the biggest surface area closest to the point of impact, **ZAR** allows air to rush through it during a swing therefore allowing the racket to travel faster. $\text{Force} = \text{mass} \times \text{acceleration}$, if we can increase the acceleration of the racket by reducing air resistance and drag, we can increase the Force of impact with the same light weight racket, and we have done just that with the new **ZAR** Technology. A simple technology such as **ZAR** can generate 6% more power. Don't forget a thin racket like a badminton racket can drive a shuttlecock to travel in excess of 300km/hr during a smash. Every gram, every millimeter counts. **ZAR** requires for us to bore a whole in one of the most critical area of the racket, the T-joint, where all forces from the player is transferred to the head frame. **ZAR** can only be achieved with supreme build quality, and we have refined the "Wrinkle Free Technology" and "Poly Matrix Carbon" and remap the structure of the T-joint to make it even stronger to make this possible. RSL have truly push the boundaries of supreme racket build quality.

What Makes RSL Rackets

No.1 in Quality

High Tech. Manufacturing Process

Wrinkle Free

- RSL Wrinkle FREE Construction
 - = Less material for Super Strength
 - = Well balanced racket allow the strong material in shaft and handle
 - = Allow Quicker racket movement

RSL with NO Wrinkle = Strong and Light Frame

- Other Brand Construction WITH Wrinkle
 - = Use more material for strength
 - = Heavy head, bad balance and sluggish play
 - = Heavy head means reducing material in shaft and handle to keep the light weight

Other Brand with Wrinkle causing bobbles = Weak Frame

- Wrinkles inside the High Modulus Graphite tubing occurs when High Modulus Graphite sheets are BENT into head shape
- Wrinkle causes bobbles which Weakens the construction

Shaft & Head

- Unique Construction Method - Racket Shaft and Head Frame are constructed separately
- Reason: The Characteristics of Shaft and Head Frame are different = different construction process
- Head Frame - Strong for high tension
 - Shaft - Must be Strong + Flexible + Anti Twisting + Powerful
- Gives - Better transfer of Power + Durable + Strong + Flex Power + Anti Twisting
- Ultra Thin 7mm shaft, only with HighTech construction

Zeero Air Resistant Technology (ZAR) is a simple but ingenious way of reducing racket air resistance. Force = mass x acceleration, if we can increase the acceleration of the racket by reducing air resistance and drag, we can increase the Force of impact with the same light weight racket.

The EXtender Stage 2 was reengineered from Stage 1 especially for Diamond X3 to work at its best with the Pulse Technology. The Pulse technology gives X2 one of the strongest head frame in the market, and with the new EXtender Stage 2 design we manage to keep the strength of the frame but injecting much more power into what is already an incredible racket.

EXtender increases the Impact Zone by 11% both in X axis and Z axis. Improvement on the X axis widens the sweet spot, easier to hit at maximum power. Improvement on the Z axis enhances the string's characteristics, allowing more depth and produce more power with total control.

Shuttlecocks can travel in excess of 300km/hr, imagine the racket speed it needs travel to generate this power? Flow Tech is design to enhance the racket frame to glide through the air as fast as possible. It will also generate a small down force around the frame to act as a natural stabiliser at high speed without adding weight, very much like a spoiler on a sports car.

X – Stiff Extra Stiff Racket built specially for Professionals. For strong powerful players, X-stiff racket means better direct transfer of power with ultra sensitive control.

With the new Super High Modulus Multi - Layered Graphite, it is important to get the ingredient right. Too much = Too Brittle. Too little = too weak to transfer the power to impact. With the right amount on RSL shafts it will give Super Durability, Flex Power and Stop Shaft Twisting.

This is a new technology to combine different layers of Structural Carbon and High Modulus Carbon together. It results in 19% more strength to our high tension frame. This means better power transfer and more accurate during impact.

The New Taper Shaft have a thinning shaft allowing higher Flex Point which results in more flex, more accurate, more power, more steeper smash, more forgiving and more feeling.

Super high Modulus Multi - Layered Graphite Constuction means High Tension Frame When stringing and able to sustain impact in double play.

With the Super High Modulus Multi - layered Graphite Construction, our Shafts can be thinner which means a reduction in weight and increase in flexibility but still with Superior Strength and Durability.

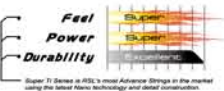

Flex Power is RSL's latest Technology by combining the characteristics of the Frame Design, Thin Flexible Shaft and matching it with the perfect Balance Point to give you Super power from a light weight frame.

STRING

Super Ti 630

- Gauge 0.64 mm
Length 10M / 33 ft ; 200M / 660 ft
Colour Black, Red, Natural, Silver, White,
Navy Blue, Purple, Fl. Green,
Fl. Yellow, Fl. Orange

Nano Technology can decrease string friction during stringing and playing which increase playing life.

Micro-Mono Filaments can increase resiliency and decrease tension loss

Nylon/Silicon Coating with Nano Technology

Nylon XT Fiber Core

Micro-Mono Filaments Braided

Super Ti 660

- Gauge 0.67 mm
Length 10M / 33 ft ; 200M / 660 ft
Colour Black, Red, Natural, Silver, White,
Navy Blue, Purple, Fl. Green,
Fl. Yellow, Fl. Orange

Nano Technology can decrease string friction during stringing and playing which increase playing life.

Micro-Mono Filaments can increase resiliency and decrease tension loss

Nylon/Silicon Coating with Nano Technology

Nylon XT Fiber Core

Micro-Mono Filaments Braided

LOVE TENSION LT70

- Gauge 0.70 mm
Length 10M / 33 ft ; 200M / 660 ft
Colour Black, Red, Natural, Silver, White,
Navy Blue, Purple, Fl. Green,
Fl. Yellow, Fl. Orange

NEW HIGH TENSION FIBER
It just gets Better and Better with More Tension! At high tensions the string becomes more sensitive and more playable than other brands! At lower tensions it keeps that playability and feel but become more durable!

NEW DIAMOND PATTERN COATING
The all new Diamond Pattern coating increase the grip upon impact which increase accuracy. The new pattern also creates an interlocking effect between strings which decreases the String Shift and keeps it in place.

GREATER TENSION GREATER PLEASURE

Micro-Mono Filaments Braided

New Pre-Stressed High Tension Core

Nylon/Silicon Coating with New Diamond Pattern

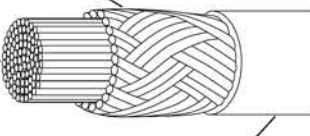

Force Ti 70

- Gauge 0.70 mm
Length 10M / 33 ft ; 200M / 660 ft

Braided Nylon Wrap: Incredible feel and consistency

Multi-filament Centre Core: Increase elasticity and durability

Braided Surface: High abrasion resistance and accurate control

- Simple classic lightweight design
- Spacious main compartment (1)
- Notebook computer compartment: (2)
 - i) Protected by 8mm foam surrounding the notebook to give maximum protection
 - ii) Sky hook system where the notebook is lifted off the bottom of the bag to avoid hard contact with the ground when resting the bag on the ground
- External padded racket compartment – separately protecting the rackets from the main compartment (3)
- Easy access front pocket
- Extra durable material at the bottom to protect from daily wear and tear
- Contoured shoulder strap to maximise comfort
- Multipurpose for leisure, daily use, going to the gym, as a racket bag....
- Can hold Badminton rackets, Squash Rackets, Tennis Rackets (4)

ACCESSORIES
PASSION 4 ACTION

EXPLORER 1

RB-902

Colour : Black , Red

Size : 700 X 370 X 260 mm

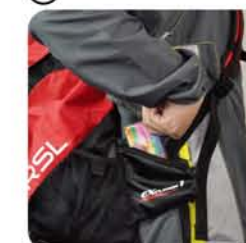

EXPLORER 1

- Excellent ergonomics to maximize usability and versatility.
- First design of its class, a back pack that completely covers and protects your RSL Rackets.
- Going to a game after work, a more discreet racket back pack design can give you the privacy you desire.
- Fully adjustable chest straps.
- Big capacity, perfect for badminton tour or long leisure holiday trips.
- Total 6 side pockets for quick and easy access.
- Rackets are arranged in a flat side formation, this reduces the displacement outwards and therefore more manoeuvrable in crowded places.
- Externally accessible shoe compartment located at the bottom for better weight distribution.
- Strong top handle.

①

②

③

EXPLORER 2

RB-901

Colour : Black , Red , Orange , White , Gold
Size : 510 X 370 X 260 mm

EXPLORER 2

- Excellent ergonomics to maximize usability and versatility.
- 2 main compartments and 1 external padded racket compartment - separates from your other badminton gear to completely protect 2-3 rackets.
- Fully adjustable chest straps.
- Total 4 side pockets for quick and easy access.
- Strong padded back support – will not feel pressure of the rackets against your back.
- Externally accessible shoe compartment located at the bottom for better weight distribution.
- Strong top handle.

EXPLORER 3/3 TOUR

3 Compartments

EXPLORER 3 TOUR

RB-904

Colour : Black , Red
Size : 740 X 290 X 410 mm

EXPLORER 3

RB-903

Colour : Black , Red
Gold , White
Size : 740 X 290 X 260 mm

EXPLORER 3

- Traditional Tour racket bag with new design features.
- Stand alone design – The Explorer 3 is designed to stand by itself without falling over. When you are waiting for a friend or traveling home on a bus, Explorer can stand with you without toppling over and without bending down to pick it up.(4)
- Extra durable material at the bottom of Explorer 3 for extra protection.
- The padded backpack shoulder straps can be neatly hidden away.
- 4 big side pockets for easy access to your personal belongings.
- 2 big compartments.
- 3 Big Compartments the new Explorer 3 Tour.
- Maximum can carry up to 20 badminton rackets without covers.
(Carry less rackets is recommended for better racket protection)
- Inner zipper pocket for valuables.
- Long handle straps on the outside, allowing the user to pick up the bag with the compartments unzipped.

RSL X Type Shoes

Positioning in the court and also the speed at which you are in position decides one wins or loses a game. In RSL, we understand the importance of speed and agility.

*They say "Be at the right place at the right time".
but with RSL X Type shoes we say "Be at ALL places AHEAD of time"*

- 1 Strong Heel Brace**
3 Dimensional support wraps perfectly around your heel to provide maximum support and protection.
- 2 Landing Force Cushion (LFC)**
Upon landing, impact absorption cushion provides protection against impact injuries and to provide comfort without losing control.
- 3 Torsion Carbon Fibre Support Plate**
A strong midsection will reduce tiredness and provide more support for the constant movement from front to back, heel to toe movement during game play. The new Carbon Fibre support plate supports the midsection with a functional shape that supports the front to back motion and also anti-twist movement.
- 4 Driving Force Cushion (DFC)**
The driving force cushion is thinner and slightly denser than LFC to provide more solid base for push off, stopping action, change of direction. So the control is the key but comfort must also be considered.
- 5 Soft Supportive Sole**
New soft and light weight sole provides a strong platform to combine all the other functions together. Flexibility provides it with mobility, the light weight construction maximise action speed and the strong platform provides support and control.
- 6 Super Suction Grip**
Gives you maximum grip when you need it the most during stopping and defence.
- 7 Strategic Directional Grip**
Directional Grip divides the sole into section and applies the right type of grip pattern to maximise grip to allowing you to have more confidence, push off quicker, change direction quicker and stop quicker.
